

Alex Johnson

AI Engineer | Machine Learning Engineer

Email: alex.johnson@example.com | Phone: +1-555-123-4567 | LinkedIn: linkedin.com/in/alexjohnson

Professional Summary

Results-driven AI Engineer with experience in machine learning, generative AI, RAG systems, MLOps, and cloud deployment. Skilled in Python, FastAPI, LangChain, vector databases, and production-grade AI applications.

Skills

Python, FastAPI, LangChain, LlamaIndex, PyTorch, TensorFlow, SQL, Docker, Kubernetes, AWS, Azure, ChromaDB, Pinecone, PostgreSQL, Git, CI/CD

Experience

Senior AI Engineer — Example AI Labs (2023–Present)

- Built enterprise RAG systems serving 50K+ monthly queries
- Reduced inference latency by 35% through optimized retrieval pipelines
- Led deployment of LLM applications on Kubernetes

Machine Learning Engineer — DataTech Inc. (2021–2023)

- Developed recommendation and NLP systems
- Implemented MLOps workflows using Docker and CI/CD
- Improved model accuracy by 12% through feature engineering

Projects

DevDocs-AI: Repository-scale RAG system with hybrid retrieval, reranking, and streaming responses.

SupportPilot: AI-powered customer support assistant using FastAPI and agent workflows.

JobTrack-AI: Automated job discovery and application management platform.

Education

B.Tech in Computer Science, Example University (2017–2021)
